

Avon blasting affects Randolph

Randolph residents near Stoughton Street and Fitch Terrace have asked about the “blasting zone” at the T.L. Edwards site across the town border in Avon. ***The ongoing blasting has caused structural damage*** to walls and basements, and we’d like Avon residents to know about it!

Few Avon residents hear the blasting – but Randolph residential neighborhoods are near there – ***hundreds of homes have been damaged*** by the repeated blasts and vibrations, which cause sinkholes and cracks in foundations and walls.

The people of Randolph would like to tell the people of Avon – our neighbors – about this issue. We presented at the Avon Select Board on November 2 – ***see our video on ACAM channel 98 or scan below*** – we’re in the video from 1:50 to 9:15

We would like you to ***sign a petition for a Warrant at the Avon Town Meeting on May 7 – please sign!*** (it’s due Feb. 8)
